Continuation of 11. does NOT place the application in condition for allowance because: Applicant's amendment to the claims overcome the rejections under 112, therefore, this rejection is withdrawn. Applicant's arguments regarding the 103 rejection of the claims is non-persuasive, as the references teach the general concept of smoothing out the transition between the working length and the conical sections of the balloon. Although the references do not specifically address a specific radius of curvature, it is considered to be an obvious matter of design choice to form the radius of curvature within the various claimed ranges to achieve the purpose disclosed in the prior art of smoothing the transition section of a balloon.
